- Kotlin - basic
- React Native - basic

I am motivated and excited in facing new challenges and tasks, I like working in complex projects with the goal of improving and learning.

I am open to new experiences and I show an excellent ability to adapt, I also think that the success of a project comes from

Summary

Computer Engineering Student at Alma Mater Studiorum - Università di Bologna (Italy), I've done a 3 months internship working full time as an Android Developer for a Startup called Beeline in London from 23/02/2017 to 23/05/2017.

From July to November 2017 I've done by myself an Android app for a virtual tour guide of Bologna.
In July 2016 I've learned by myself Android development with Android Studio and I made my very first Android app: it was a simple compass app pointing north with a nice user interface and some nice features.
I've been working in my father's bakery since April 2014 and I made by myself the website of the bakery.

While I was in London I've been to some tech events: 3 Londroid (Android Developer meetups in London), a Kotlin event and the Google I/O extended 2017 at Google Campus in London, and I've been to several tech events in Bologna too. I've always loved computer and technology and I've been writing articles about computers and technology from September 2016 to February 2018.
